eBots RFID Printer Registry Setting

- Please ensure that the eBots version is 7.0 or higher, as even with this registry setting, eBots 6.x will not encode tags.
- The following registry setting **must** be added to the machine connected to RFID printer in order for the RFID tags to **encode**; if you added the registry setting and then upgraded to 7.x, please double-check that the registry setting is still there.
- Once the registry setting has been added, **landscape** labels will **no longer print** correctly, which should not be a problem as the RFID labels have a portrait orientation.

Windows 10 or 64-bit Windows 7 machines:

HKEY_LOCAL_MACHINE\SOFTWARE\WOW6432NODE\EBOTS\APPLICATIONS\EBZLJTPRINTSVC\CONFIG URATION....

Add "EnableRFID", Value "1"
